REGISTERED FUR MANAGEMENT AREAS IN ALBERTA

Registered Fur Management Area(s) (RFMA) are parcels of public land where the holder of the registered fur management license is permitted to hunt and trap fur-bearing animals on the land during the allotted time. Trapping seasons vary based on zones and species throughout Alberta.

Trapping is a highly regulated industry that provides many societal and ecological benefits. These include, assisting with wildlife monitoring and recording species population trends through annual trapper harvest reports. Managing and monitoring fur-bearing populations reduce the risk of diseases within species and provides tools for wildlife conservation. Additionally, many methods used by trappers have been adopted in the nuisance wildlife control industry. Priorities of the trapping community include supporting the sustainable management of furbearers as well as their habitat in Alberta.

if interested in discussing further, please contact Shayna at ag2@ranchland66.com or 403-646-3131.

If you would like to contribute to this bulletin by writing an article, submitting a photo to be featured, recommending an organization, noxious weed, or grant, or any other suggestions, please send an email to ag2@ranchland66.com with the subject line "Bulletin". Thanks for reading and I look forward to your feedback!

ORGANIZATION HIGHLIGHT

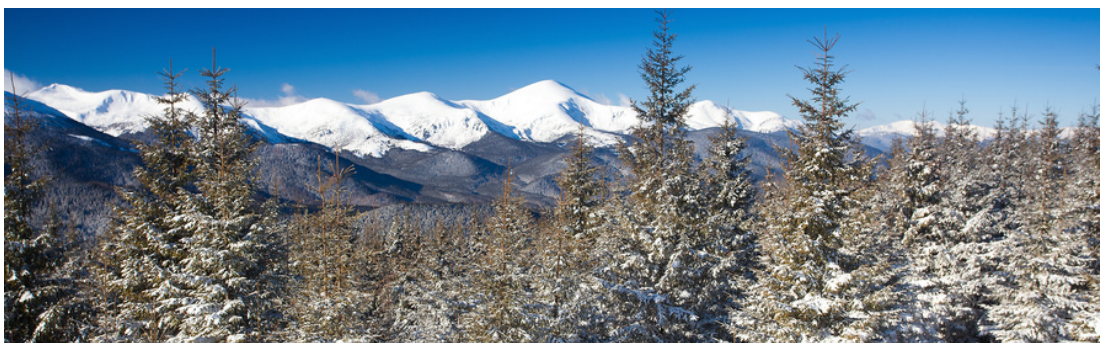

Alberta Native Plant Council

<https://naturealberta.ca/alberta-native-plant-council/>

The Alberta Native Plant Council Society (ANPC) is a grassroots group of dedicated plant enthusiasts who have supported the conservation of native plants and native plant habitat in Alberta since 1988. Their motto is "Sharing Knowledge, Supporting Conservation." They provide outreach, publications, guidelines, stewardship, advocacy, and funding, while also implementing and supporting native plant initiatives.
